for

Volume 75, 1956

This section contains complete multientry indexes covering the contents of *Electrical Engineering* for the calendar year 1956. It includes all special articles and authors, all news items, and all items published in *Electrical Engineering* on AIEE technical program papers, whether they appear in the form of a digest, essential full text, or full text. The technical program papers are indexed also by both title and author.

With further reference to technical program papers, if a *Digest* appears, it will be listed as (Digest of 56-000). If the essential full text or the full text appears, it will be listed simply as (56-000).

The contents are arranged according to **Subject** and **Author Index** listing articles, authors, **News Index**, listing all items that appeared in Institute Activities, Of Current Interest, and Electrical Engineering Education sections, with a **Biographical Index** of personal and obituary items on AIEE members.
